

It is very disconcerting that the FCC has not promoted Docket 02-277. This issue is vital to public interest and would expect the FCC to be much more diligent in providing information to citizens along both sides of the "great digital divide".

What I see in our city worries me as far as media controlling our perceptions. When I drive around San Antonio it seems that Clear Channel owns everything in media. For example: Virtually all the billboards along the streets and highways. In the airport, all the wall advertisements leading to every terminal. WOAI (NBC) tv station. Multiple radiostations. Ticket venues and advertisement at the Verizon Amphitheater and SBC Center. Huge financial supporter to the Bush Adm. and promoter for the "Patriot Rallies".

If the proposal are passed , it will further reveal to me that the FCC is not serving the best interest of the American Public. The FCC is a governmental body that should represent the citizens of America not the Corporations of America.

Thank you
